Cloud DG Implementation Approach & Methodology

Install, Assess, & Plan

Framework & Design

Pilot & Implement

Adopt, Expand, & Optimize

Technical Operationalization

- · Platformarchitecture
- Tools deployment
- Technical enablement
- Installation runbook
- Sizing
- Security Configuration

- Data Governance Operating Model
- Automated assessment process
- Use case patterns and workflows
- Operational DG playbook

- Pilot execution
- Execute 'Day in the life of' scenarios in CDGC, CDQ, CDMP
- Stewards and user onboarding
- CDGC enablement for DG community

- Onboarding additional use cases
- Continued training and evangelization
- Periodic check points to assess progress

Business Engagement

- Data Governance Assessment/Workshop
- Business objectives, success measures, pain points
- Use cases and high-level requirements
- Recommendations, high level roadmap

- Future state operating model and org. structure
- Key roles and responsibilities
- Data governance charter and guiding principals
- Program success metrics
- Comm and change impact plan

- · Guidance for DG rollout
- Project plan based on tactical roadmap
- Roles and responsibilities aligned with resources
- · Standard DG processes
- Best practice to sustain DG business model
- Socialization & Enablement

- Program expansion support business
- Identification of additional business use cases to further demonstrate business value

Data Governance Strategy

Grow the DG Program Incrementally

Practice new roles, processes—modify as needed

- Start small—1-2 pilot projects
- Business leads the fact-finding and issue resolution discussions with critical stakeholders
- Practice new processes
- Prove the business value

- Prove that the process works by communicating key metrics (\$\$, scope)
- Assess participation and trust in DG best practices
- Assess changes to data quality, definitions & reliability

- Consider tools & automation
- Data catalogs, data quality monitoring, metadata management, workflow management
- Data integration platform
- DG process flow, documentation and transparency
